

Chapter-End Activities

Chapter 1: Computer Skills

Activity 1: Computer Quiz Competition

Objective

To assess students' understanding of the concepts learned in **Computer Skills** through an interactive quiz competition.

Materials Required

- Quiz Question Cards
- Whiteboard & Marker
- Score Sheet
- Bell/Buzzer (Optional)

Instructions

1. Divide the class into **2–4 teams**.
2. Ask questions related to the chapter.
3. Teams discuss and answer within the given time.
4. Award one point for each correct answer.
5. The team with the highest score wins.

Sample Quiz Questions

- What is a computer?
- What is hardware?
- Name two input devices.
- Name two output devices.
- Which device stores data permanently?
- What is digital ethics?
- Why should we protect our passwords?
- Name one good computer care practice.

Assessment Criteria

- Accuracy
- Teamwork

- Participation
 - Confidence
 - Computer Knowledge
-

Activity 2: Hardware Identification Challenge

Objective

To evaluate students' ability to identify computer hardware devices and explain their functions.

Materials Required

- Hardware Flashcards
- Real Computer Devices (if available)
- Device Picture Cards

Instructions

1. Display one hardware device or picture at a time.
2. Students identify the device.
3. Explain its function.
4. Classify it as an **Input, Output, or Storage Device**.
5. Continue until all devices have been identified.

Devices for Identification

- Monitor
- CPU
- Keyboard
- Mouse
- Printer
- Scanner
- Speakers
- Webcam
- Microphone
- Pen Drive
- Hard Disk
- Memory Card

Assessment Criteria

- Correct Identification
 - Device Classification
 - Function Explanation
 - Confidence
 - Participation
-

Activity 3: Team Presentation

Objective

To encourage teamwork and improve communication skills by presenting chapter concepts.

Materials Required

- Chart Paper
- Marker Pens
- Flashcards
- Computer Pictures

Instructions

1. Divide students into small groups.
2. Assign one topic to each team.
3. Teams prepare a **2–3 minute presentation**.
4. Each member participates in the presentation.
5. Teacher provides feedback after every presentation.

Presentation Topics

- Computer System
- Hardware Devices
- Input Devices
- Output Devices
- Storage Devices
- Computer Care
- Digital Ethics
- Responsible Technology Use

Assessment Criteria

- Teamwork
- Subject Knowledge
- Communication Skills

- Creativity
 - Presentation Confidence
-

Activity 4: Digital Citizenship Quiz

Objective

To assess students' understanding of digital citizenship, online safety, and responsible technology use.

Materials Required

- Digital Citizenship Quiz Worksheet
- Flashcards
- Whiteboard

Instructions

1. Conduct an individual or team quiz.
2. Read each question clearly.
3. Students answer verbally or in writing.
4. Discuss the correct answers together.

Sample Questions

- What is digital citizenship?
- Why should we use strong passwords?
- Should we share personal information online?
- How should we behave during online classes?
- What should you do if you see inappropriate content online?

Assessment Criteria

- Digital Safety Knowledge
 - Responsible Behavior
 - Correct Answers
 - Participation
 - Communication Skills
-

Activity 5: Computer Safety Poster Competition

Objective

To promote awareness of computer care and digital safety through creative poster making.

Materials Required

- A4 Drawing Sheet
- Color Pencils/Crayons
- Sketch Pens
- Pencil and Eraser

Instructions

1. Students create a poster on "**Computer Safety**" or "**Be a Responsible Digital Citizen.**"
2. Include drawings, symbols, and safety messages.
3. Display all posters in the classroom.
4. Students explain the message shown in their poster.
5. Teacher evaluates creativity and understanding.

Suggested Poster Themes

- Keep Your Password Safe
- Think Before You Click
- Protect Personal Information
- Be Kind Online
- Follow Computer Lab Rules
- Safe Internet Use
- Handle Computers with Care

Assessment Criteria

- Creativity
- Relevance to Theme
- Neatness
- Presentation
- Awareness of Safety Rules

Activity 6: Oral Assessment

Objective

To evaluate students' understanding of chapter concepts through verbal responses.

Instructions

Each student answers **3–5 oral questions** related to the chapter.

Sample Questions

- What is hardware?
- Name three input devices.
- Name two storage devices.
- Why should we take care of computers?
- What is digital ethics?
- How can we stay safe online?
- What is responsible technology use?
- Why should we protect our passwords?

Assessment Criteria

- Speaking Confidence
 - Subject Knowledge
 - Communication Skills
 - Accuracy
 - Pronunciation
-

Activity 7: Practical Evaluation

Objective

To assess students' practical understanding of the skills learned in **Chapter 1: Computer Skills**.

Practical Tasks

Students should:

- Identify common computer hardware devices.
- Classify devices as **Input**, **Output**, or **Storage**.
- Explain the function of each device.
- Demonstrate correct computer care practices.
- Follow computer lab rules.
- Answer digital citizenship and online safety questions.

- Complete a simple device classification worksheet.

Practical Evaluation Rubric

Assessment Area	Marks
Hardware Identification	20
Device Classification	15
Computer Care	15
Digital Citizenship	15
Oral Communication	15
Practical Skills	20
Total	100 Marks

Chapter Learning Outcomes

After completing the **Chapter-End Activities** for **Chapter 1: Computer Skills**, students will be able to:

- Demonstrate a clear understanding of **computer fundamentals, hardware devices, input, output, and storage devices**.
- Apply proper **computer care**, follow **computer lab rules**, and use technology responsibly.
- Explain the importance of **digital citizenship, online safety, and responsible technology use**.
- Communicate confidently through quizzes, presentations, discussions, and oral assessments.
- Work collaboratively in team-based activities while developing problem-solving, observation, and presentation skills.
- Successfully complete both theoretical and practical evaluations, building a strong foundation for advanced computer learning.
