

Chapter 1: Computer Skills

Class 1: Practical / Activities (20 Minutes)

Topic: Hardware Device Identification, Computer System Labeling Activity & Picture Matching Worksheet

Activity 1: Hardware Device Identification (5 Minutes)

Objective

To help students identify common computer hardware devices and understand their basic functions.

Materials Required

- Computer Hardware Flashcards
- Real Computer/Laptop (if available)
- Monitor, Keyboard, Mouse (Demonstration)
- Hardware Identification Worksheet
- Whiteboard and Marker

Instructions

1. The teacher introduces common computer hardware devices.
2. Show each hardware device or flashcard one by one.
3. Ask students to identify the device and say its name.
4. Students explain the basic function of each device.
5. The teacher summarizes the correct answers.

Hardware Devices for Identification

- Monitor
- CPU (System Unit)
- Keyboard
- Mouse
- Printer
- Scanner

- Speakers
- Webcam
- Microphone
- UPS

Sample Questions

- What is the name of this device?
- Is it an input or output device?
- What is its function?
- Where do we use this device?

Teacher Observation Checklist

- ☐ Identifies hardware devices correctly.
 - ☐ Explains basic functions.
 - ☐ Participates confidently.
 - ☐ Responds accurately.
 - ☐ Shows interest during the activity.
-

Activity 2: Computer System Labeling Activity (5 Minutes)

Objective

To help students identify and label the main parts of a computer system correctly.

Materials Required

- Computer System Diagram Worksheet
- Pencil and Eraser
- Whiteboard
- Computer Picture Chart

Instructions

1. Provide each student with a computer system diagram.

2. Students observe the picture carefully.
3. Write the correct name beside each part.
4. Draw lines connecting the labels to the correct hardware.
5. Discuss the answers together.

Parts to Label

- Monitor
- CPU (System Unit)
- Keyboard
- Mouse
- Printer
- Speakers
- Webcam

Extension Activity

Students color the computer diagram neatly after labeling.

Teacher Observation Checklist

- ☐ Labels all computer parts correctly.
- ☐ Recognizes the computer system.
- ☐ Uses neat handwriting.
- ☐ Completes the worksheet independently.
- ☐ Participates actively.

Activity 3: Picture Matching Worksheet (5 Minutes)

Objective

To improve students understanding of hardware devices by matching pictures with their correct names and functions.

Materials Required

- Picture Matching Worksheet
- Hardware Flashcards
- Pencil and Eraser

Instructions

1. Distribute the worksheet.
2. Students observe each picture.
3. Match the picture with the correct device name.
4. Draw a line between the picture and its function.
5. Review the answers as a class.

Sample Matching Activity

Picture Match With

Monitor

Keyboard

Mouse

Printer

Microphone

Webcam

Speakers

Scanner

Teacher Observation Checklist

- ☐ Matches pictures correctly.
- ☐ Identifies device names.
- ☐ Understands device functions.
- ☐ Completes the worksheet neatly.
- ☐ Participates enthusiastically.

Activity 4: Hardware Function Challenge (5 Minutes)

Objective

To reinforce students understanding of computer hardware and their functions through an interactive classroom challenge.

Materials Required

- Function Flashcards
- Hardware Cards
- Whiteboard
- Score Chart

Instructions

1. Divide the class into small teams.
2. Show one hardware card at a time.
3. Teams identify the device and explain its function.
4. Each correct answer earns one point.
5. Continue until every team has answered several questions.
6. Appreciate all teams and announce the highest-scoring team.

Sample Questions

- Which device is used for typing?
- Which device displays information?
- Which device prints documents?
- Which device records sound?
- Which device captures videos?
- Which device controls the pointer?

Teacher Observation Checklist

- ☐ Identifies hardware correctly.
 - ☐ Explains functions accurately.
 - ☐ Works well in a team.
 - ☐ Demonstrates confidence.
 - ☐ Participates actively.
-

Practical Time Distribution

Activity	Duration
Hardware Device Identification	5 Minutes
Computer System Labeling Activity	5 Minutes
Picture Matching Worksheet	5 Minutes
Hardware Function Challenge	5 Minutes
Total Practical Time	20 Minutes

Expected Learning Outcomes

After completing these practical activities, students will be able to:

- Identify the major **hardware components** of a computer system.
- Label the parts of a computer accurately.
- Match computer hardware devices with their names and functions.
- Explain the purpose of common input and output devices.
- Participate confidently in individual and team-based computer activities.
- Develop observation, communication, and basic digital literacy skills through hands-on learning.
