

Chapter 1: Computer Skills

Class 4: Practical / Activities (20 Minutes)

Topic: Computer Quiz, Picture Identification, Team Challenge, Oral Assessment & Practical Revision

Activity 1: Computer Quiz (5 Minutes)

Objective

To assess students' understanding of the concepts learned in **Computer Skills**, including computer fundamentals, hardware devices, input, output and storage devices, computer care, digital ethics, and responsible technology use.

Materials Required

- Computer Quiz Worksheet
- Quiz Flashcards
- Whiteboard & Marker
- Pencil and Eraser

Instructions

1. The teacher distributes the quiz worksheet to all students.
2. Students answer the questions individually.
3. Review each answer with the class.
4. Encourage students to explain the correct answers.
5. Appreciate students for their participation.

Sample Quiz Questions

1. What is a computer?
2. Which device is used for typing?
3. Name two output devices.
4. Which device stores data permanently?
5. What is digital ethics?
6. Why should we protect our passwords?
7. Name one storage device.
8. Why is computer care important?

Teacher Observation Checklist

- ☐ Answers questions correctly.
 - ☐ Demonstrates understanding of computer concepts.
 - ☐ Participates confidently.
 - ☐ Completes the quiz independently.
 - ☐ Shows interest in learning.
-

Activity 2: Picture Identification (5 Minutes)

Objective

To help students recognize and identify computer hardware devices and classify them correctly.

Materials Required

- Hardware Picture Flashcards
- Device Identification Worksheet
- Whiteboard
- Pencil and Eraser

Instructions

1. Display pictures of different computer devices.
2. Students identify the name of each device.
3. Students classify each device as:
 - **Input Device**
 - **Output Device**
 - **Storage Device**
4. Students explain one function of each device.
5. Discuss the answers together.

Devices for Identification

- Keyboard
- Mouse
- Monitor
- Printer

- Scanner
- Microphone
- Webcam
- Speakers
- Pen Drive
- Hard Disk
- Memory Card
- Projector

Teacher Observation Checklist

- ☐ Identifies hardware devices correctly.
 - ☐ Classifies devices accurately.
 - ☐ Explains device functions.
 - ☐ Participates actively.
 - ☐ Demonstrates confidence.
-

Activity 3: Team Challenge (5 Minutes)

Objective

To reinforce computer concepts through a collaborative team-based challenge that develops teamwork and problem-solving skills.

Materials Required

- Computer Question Cards
- Device Flashcards
- Team Scoreboard
- Whiteboard

Instructions

1. Divide the class into **2–4 teams**.
2. Each team selects a question card.
3. Teams discuss and answer within the given time.
4. Correct answers earn one point.
5. Bonus points are awarded for explaining the answer correctly.

6. The team with the highest score is recognized.

Sample Challenge Questions

- Identify an input device.
- Name two storage devices.
- Which device displays information?
- Why should we use strong passwords?
- What is digital citizenship?
- Which device is used to print documents?
- How should we take care of a computer?
- Name three computer lab rules.

Teacher Observation Checklist

- ☐ Works cooperatively with teammates.
 - ☐ Answers correctly.
 - ☐ Explains concepts clearly.
 - ☐ Participates enthusiastically.
 - ☐ Demonstrates teamwork.
-

Activity 4: Oral Assessment & Practical Revision (5 Minutes)

Objective

To evaluate students' speaking skills and reinforce the concepts learned throughout Chapter 1.

Materials Required

- Oral Question Cards
- Computer Device Flashcards
- Whiteboard

Instructions

1. Each student selects one oral question card.

2. Students answer the question in complete sentences.
3. The teacher asks follow-up questions where appropriate.
4. Revise important chapter concepts before concluding the session.

Sample Oral Questions

- What is a computer?
- What is hardware?
- Name three input devices.
- Name three output devices.
- What is the function of a keyboard?
- What is a storage device?
- Why should we take care of computers?
- What is digital ethics?
- How can you stay safe while using the internet?
- Name one good digital habit.

Teacher Observation Checklist

- ☐ Speaks clearly and confidently.
- ☐ Uses complete sentences.
- ☐ Answers accurately.
- ☐ Demonstrates good communication skills.
- ☐ Participates actively in revision.

Practical Time Distribution

Activity	Duration
Computer Quiz	5 Minutes
Picture Identification	5 Minutes
Team Challenge	5 Minutes
Oral Assessment & Practical Revision	5 Minutes
Total Practical Time	20 Minutes

Expected Learning Outcomes

After completing these practical activities, students will be able to:

- Recall and apply the concepts learned in **Chapter 1: Computer Skills**.
- Identify and classify **computer hardware, input, output, and storage devices** correctly.
- Explain the importance of **computer care, digital ethics, and responsible technology use**.
- Demonstrate confidence in answering oral questions and participating in team-based activities.
- Strengthen communication, collaboration, observation, and critical thinking skills through interactive revision and assessment activities.
- Be well prepared for subsequent chapters through comprehensive practical revision.
