

Chapter 3: Digital Awareness

Class 12: Practical / Activities (20 Minutes)

Topic: AI Tool Demonstration, AI Image Identification, Smart Technology Discussion & Group Presentation

Activity 1: AI Tool Demonstration (5 Minutes)

Objective

To introduce students to Artificial Intelligence (AI) tools and demonstrate how AI can assist in learning and everyday tasks.

Materials Required

- Computer/Laptop
- Internet Connection (Optional)
- Projector/Smart Board
- AI Tool Demonstration Slides
- Observation Worksheet

Instructions

1. The teacher briefly explains what Artificial Intelligence (AI) is.
2. Demonstrate one or two simple AI-powered tools (such as a voice assistant, AI translator, or educational AI application).
3. Show how AI responds to simple questions or performs tasks.
4. Discuss how AI helps people in daily life.
5. Students complete the observation worksheet.

Sample AI Tools for Demonstration

- Voice Assistant
- AI Language Translator
- AI Educational Learning App
- AI Chatbot
- Smart Camera with Face Recognition

- AI Search Assistant

Observation Questions

- What task did the AI tool perform?
- How did AI help the user?
- Where can this AI tool be used?
- What are the benefits of using AI?
- Why should AI be used responsibly?

Teacher Observation Checklist

- ☐ Understands the purpose of AI.
 - ☐ Identifies different AI tools.
 - ☐ Observes the demonstration carefully.
 - ☐ Answers questions correctly.
 - ☐ Participates actively.
-

Activity 2: AI Image Identification (5 Minutes)

Objective

To help students identify AI-powered technologies through pictures and explain their real-life applications.

Materials Required

- AI Technology Picture Cards
- AI Identification Worksheet
- Whiteboard
- Marker

Instructions

1. Display pictures of AI-enabled devices and technologies.
2. Students identify each image.

3. Students explain where the technology is used.
4. Discuss how AI improves daily life.
5. Complete the AI Image Identification Worksheet.

Images for Identification

- Smart Speaker
- Robot
- Self-Driving Vehicle (Concept)
- Face Recognition System
- Smart Watch
- Smart Home Device
- Delivery Robot
- AI Chatbot
- Smart Camera
- Voice Assistant

Sample Questions

- What is the name of this AI technology?
- Where is it used?
- How does AI help people?
- Is it used at home, school, hospital, or workplace?

Teacher Observation Checklist

- ☐ Identifies AI technologies correctly.
 - ☐ Explains their uses.
 - ☐ Participates in discussion.
 - ☐ Demonstrates digital awareness.
 - ☐ Completes the worksheet independently.
-

Activity 3: Smart Technology Discussion (5 Minutes)

Objective

To encourage students to think about how AI and smart technology improve everyday life.

Materials Required

- Discussion Topic Cards
- Whiteboard
- Marker

Instructions

1. Divide students into **small groups**.
2. Give each group one discussion topic.
3. Allow **2–3 minutes** for discussion.
4. Each group shares one or two key ideas with the class.
5. The teacher summarizes the discussion.

Discussion Topics

- How does AI help students in education?
- How do smart devices make our lives easier?
- Where do we use AI in hospitals?
- How is AI used in transportation?
- Should AI always be used responsibly? Why?
- What are the advantages of smart technology?

Teacher Observation Checklist

- ☐ Shares ideas confidently.
 - ☐ Participates in group discussion.
 - ☐ Demonstrates understanding of AI.
 - ☐ Respects others' opinions.
 - ☐ Uses appropriate communication skills.
-

Activity 4: Group Presentation (5 Minutes)

Objective

To develop teamwork, communication skills, and understanding of AI applications through a short presentation.

Materials Required

- Chart Paper or A4 Sheets
- Sketch Pens
- AI Topic Cards
- Whiteboard

Instructions

1. Divide the class into **4–5 groups**.
2. Assign each group one AI-related topic.
3. Groups prepare a **2-minute presentation** using simple diagrams or keywords.
4. One or two members present their topic to the class.
5. The teacher provides feedback and appreciates all groups.

Presentation Topics

- AI in Education
- AI in Healthcare
- AI in Smart Homes
- AI in Transportation
- AI in Agriculture
- AI in Communication

Presentation Guidelines

Students should include:

- What the technology is.
- Where it is used.
- Two benefits.
- One example from daily life.
- One responsible way to use it.

Teacher Observation Checklist

☐ Works cooperatively with group members.

- ☐ Presents clearly and confidently.
 - ☐ Explains AI applications correctly.
 - ☐ Uses simple visual aids.
 - ☐ Answers questions appropriately.
-

Practical Time Distribution

Activity	Duration
AI Tool Demonstration	5 Minutes
AI Image Identification	5 Minutes
Smart Technology Discussion	5 Minutes
Group Presentation	5 Minutes
Total Practical Time	20 Minutes

Expected Learning Outcomes

After completing these practical activities, students will be able to:

- Identify common **Artificial Intelligence (AI)** tools and explain their basic functions.
- Recognize AI-powered devices and describe their applications in everyday life.
- Discuss the benefits and responsible use of **smart technologies** in different sectors.
- Demonstrate teamwork, communication, and presentation skills while sharing ideas about AI.
- Develop curiosity about emerging technologies and understand their positive impact on education, healthcare, transportation, agriculture, and daily living.
- Build awareness of using AI ethically, responsibly, and safely in the digital world.
