

Chapter 3: Digital Awareness

Class 9 – Technology Around Us, Smart Devices & Digital Services

Learning Objectives

After completing this lesson, students will be able to:

- Understand the meaning of technology and its importance in daily life.
 - Identify different types of smart devices.
 - Explain how digital services make everyday tasks easier.
 - Recognize the uses of ATMs, QR codes, and digital payment systems.
 - Understand the benefits and responsible use of modern technology.
 - Develop awareness of safe and smart technology usage.
-

Introduction

Technology has become an important part of our daily lives. From smartphones and smart TVs to online ticket booking and digital payments, technology helps us communicate, learn, travel, shop, and complete many tasks quickly and easily.

Smart devices and digital services save time, improve efficiency, and make our lives more convenient. However, we must use technology responsibly and safely.

What is Technology?

Technology is the use of scientific knowledge, tools, machines, and digital devices to solve problems and make our work easier.

Examples of Technology

- Computers
- Smartphones
- Tablets
- Smart TVs
- ATM Machines

- QR Codes
 - Digital Payment Systems
 - Smart Watches
 - GPS Navigation
-

Technology in Daily Life

Technology is used almost everywhere.

At Home

- Watching educational videos
- Online shopping
- Paying electricity and water bills
- Smart home appliances
- Video calling family members

At School

- Smart classrooms
- Computer laboratories
- Digital learning
- Online assignments
- Educational apps

In Hospitals

- Digital patient records
- Medical scanning equipment
- Online appointment booking

In Banks

- ATM services
 - Online banking
 - Digital payments
 - Mobile banking
-

Smart Devices

Smart devices are electronic devices that can connect to the internet and perform different tasks automatically or with user commands.

Smartphone

A smartphone is a mobile device used for communication, learning, entertainment, and internet access.

Uses

- Making phone calls
 - Sending messages
 - Online learning
 - Video conferencing
 - Digital payments
 - Internet browsing
-

Tablet

A tablet is a portable touchscreen computer.

Uses

- Reading e-books
 - Watching educational videos
 - Drawing and designing
 - Online classes
 - Playing educational games
-

Smart TV

A Smart TV connects to the internet and provides digital entertainment.

Uses

- Watching educational videos
- Streaming movies
- Accessing online learning platforms
- Browsing digital content

Smart Watch

A smart watch is a wearable digital device.

Uses

- Showing time
- Tracking fitness
- Measuring heart rate
- Receiving notifications
- Setting reminders

ATM (Automated Teller Machine)

An **ATM** is an electronic machine that allows customers to perform banking transactions without visiting a bank counter.

Uses

- Withdraw cash
- Deposit money
- Check account balance
- Print mini statements
- Transfer money (available in some ATMs)

QR Codes

A **QR (Quick Response) Code** is a square barcode that stores digital information.

Uses

- Digital payments
- Website links
- Event tickets
- Product information
- Attendance systems

Students can scan QR codes using a smartphone camera or QR code scanner.

Digital Payments (Introduction)

Digital payment means paying money electronically instead of using cash.

Examples

- UPI Payments
- Mobile Wallets
- Debit Cards
- Credit Cards
- Internet Banking

Advantages

- Fast and convenient
 - Secure transactions
 - No need to carry cash
 - Easy payment records
-

Online Ticket Booking

Technology allows us to book tickets online.

Examples

- Train tickets
- Bus tickets
- Flight tickets
- Movie tickets
- Event tickets

Benefits

- Saves time
- Easy booking
- Online payment
- Instant confirmation

Self-Service Kiosks

A **self-service kiosk** is a touchscreen machine that allows users to perform services independently.

Examples

- Railway ticket kiosks
 - Airport check-in kiosks
 - Hospital registration kiosks
 - Information kiosks in shopping malls
-

Uses of Technology at Home

Technology helps us:

- Learn online
 - Watch educational programs
 - Communicate with relatives
 - Shop online
 - Pay bills
 - Control smart appliances
-

Uses of Technology at School

Technology supports education by:

- Smart classrooms
 - Digital presentations
 - Online homework
 - Educational games
 - Computer-based learning
 - Research projects
-

Advantages of Smart Technology

Smart technology provides many benefits.

Advantages

- Saves time
 - Increases productivity
 - Improves communication
 - Makes learning interactive
 - Provides quick access to information
 - Supports digital services
 - Makes daily tasks easier
-

Responsible Use of Smart Devices

Students should use smart devices responsibly.

Good Habits

- Use devices for learning.
 - Limit screen time.
 - Keep personal information private.
 - Ask parents before downloading apps.
 - Use trusted websites only.
 - Handle devices carefully.
 - Take regular breaks from screens.
-

Digital Citizenship

A good digital citizen:

- Uses technology responsibly.
 - Respects others online.
 - Protects personal information.
 - Uses polite language.
 - Reports inappropriate content to trusted adults.
-

Did You Know?

- QR stands for **Quick Response**.
 - Smartphones can perform the work of many devices such as cameras, calculators, and music players.
 - Smart watches can monitor fitness and health activities.
 - Technology is used in almost every profession today.
-

Points to Remember

- Technology makes our daily work easier and faster.
- Smart devices connect people and information.
- Digital services save time and improve convenience.
- QR codes help us access information and make payments quickly.
- ATMs provide banking services at any time.
- Always use technology safely and responsibly.
- Protect your personal information while using digital devices.
