

Chapter 1: AI Productivity & Research

Chapter-End Activity

Activity 1: Individual – AI Productivity Quiz & Mini AI Assessment

Objective

To assess each student's understanding of AI productivity concepts, research techniques, note-making, project planning, fact checking, and responsible AI use through a written quiz and practical AI-based task.

Materials Required

- Computer/Laptop or Tablet
 - Internet Connection
 - AI Tool (ChatGPT, Google Gemini, Microsoft Copilot or Perplexity AI)
 - Student Quiz Worksheet
 - Mini AI Assessment Sheet
 - Teacher Evaluation Sheet
-

Instructions

1. Students complete the **AI Productivity Quiz** individually.
 2. Each student selects one academic topic.
 3. Use an AI tool to:
 - Research the topic.
 - Summarize it into five key points.
 - Create a simple project plan.
 - Verify one important fact using a reliable source.
 4. Present the completed work to the teacher for evaluation.
-

Part A – AI Productivity Quiz

Multiple Choice Questions

1. What is the main purpose of AI productivity tools?

- a) Entertainment only
 - b) Improve learning and productivity ☒
 - c) Replace teachers
 - d) Play games
-

2. Which AI tool can help students research academic topics?

- a) ChatGPT ☒
 - b) Calculator
 - c) Paint
 - d) Camera
-

3. What should students do before using AI-generated information in assignments?

- a) Copy it directly
 - b) Verify it using reliable sources ☒
 - c) Ignore it
 - d) Delete it
-

4. Which of the following is an example of responsible AI use?

- a) Copying AI responses without checking
- b) Verifying information and giving proper credit ☒

- c) Sharing false information
 - d) Ignoring textbooks
-

5. Which activity improves revision using AI?

- a) Watching random videos
 - b) Creating summarized study notes 
 - c) Playing games
 - d) Browsing social media
-

Part B – Short Answer Questions

1. What is AI productivity?
 2. How does AI help students in research?
 3. Name four AI productivity tools.
 4. What is note-making?
 5. Why is summarization useful?
 6. Why should AI-generated information be verified?
 7. What is a project plan?
 8. What is fact checking?
 9. What is responsible AI use?
 10. Mention four real-life applications of AI productivity.
-

Mini AI Assessment

Students should complete the following practical tasks:

- Select one academic topic.
- Write an effective AI prompt.
- Collect research information.
- Prepare a summary with five key points.
- Create a simple project plan.
- Verify one important fact using a textbook or reliable educational source.
- Present the completed work.

Teacher Observation Checklist

- ✓ Writes effective AI prompts.
- ✓ Uses AI responsibly.
- ✓ Organizes research clearly.
- ✓ Verifies AI-generated information.
- ✓ Completes the practical task independently.

Activity 2: Team – AI Productivity Challenge & Research Workshop

Objective

To develop teamwork, research, communication, and AI productivity skills by completing a collaborative research project using AI tools responsibly.

Materials Required

- Computer/Laptop or Tablet
- Internet Connection
- AI Productivity Tools
- Chart Paper or Presentation Software
- Team Activity Worksheet
- Teacher Evaluation Sheet

Instructions

1. Divide students into **groups of 3–5 members**.
2. Each team selects one research topic.
3. Use AI tools to:
 - Collect research information.

- Summarize key findings.
 - Verify important facts.
 - Organize information into a presentation or poster.
 - 4. Assign team roles:
 - Team Leader
 - Researcher
 - Fact Checker
 - Content Writer
 - Presenter
 - 5. Deliver a **3–5 minute presentation** explaining the research findings.
 - 6. Participate in a short question-and-answer session.
-

Suggested Research Topics

- Artificial Intelligence in Education
 - Climate Change
 - Renewable Energy
 - Water Conservation
 - Cyber Safety
 - Plastic Pollution
 - Digital Citizenship
 - Healthy Lifestyle
 - Sustainable Development
 - Space Exploration
-

Team Activity Checklist

Activity	Completed (✓)
Topic Selected	☐
Research Completed	☐
AI Prompt Prepared	☐
Information Verified	☐
Presentation Prepared	☐
Team Presentation Delivered	☐

Group Discussion Questions

1. How did AI help your team complete the research?
 2. Why was fact checking necessary?
 3. What challenges did your team face?
 4. How did teamwork improve the quality of the project?
 5. Which AI productivity skill was most useful?
-

Teacher Observation Checklist

- ☒ Demonstrates teamwork.
 - ☒ Uses AI responsibly.
 - ☒ Verifies information accurately.
 - ☒ Presents research confidently.
-

Activity 3: Recognition – Best AI Researcher Award

Objective

To recognize students who demonstrate excellent research skills, responsible AI use, critical thinking, and effective application of AI productivity tools.

Award Criteria

Students are evaluated based on:

- Research Quality
- Prompt Writing Skills
- Information Organization
- Fact Checking
- Responsible AI Use
- Creativity
- Critical Thinking
- Presentation Skills
- Accuracy
- Overall Performance

Recognition

Best AI Researcher Award

Awarded to the student who demonstrates outstanding AI-assisted research skills, accurate information gathering, effective organization, responsible AI use, and excellent presentation of research findings.

Activity 4: Recognition – Best AI Productivity Team Award

Objective

To recognize the team that demonstrates excellent collaboration, AI productivity, research quality, and communication.

Award Criteria

Teams are evaluated on:

- Team Collaboration
 - Research Accuracy
 - AI Productivity Skills
 - Fact Verification
 - Presentation Quality
 - Communication
 - Creativity
 - Time Management
 - Equal Participation
 - Overall Team Performance
-

Recognition

Best AI Productivity Team Award

Awarded to the team that demonstrates outstanding collaboration, responsible AI usage, excellent research practices, and effective presentation skills.

Activity 5: Practical Evaluation

Objective

To evaluate students' ability to apply all AI productivity skills learned in Chapter 1 through individual and team-based practical activities.

Practical Tasks

Students should demonstrate the ability to:

- Use AI tools for academic research.
- Write effective AI prompts.
- Summarize research information.
- Create a simple project plan.
- Verify AI-generated information using reliable sources.
- Organize research findings into structured notes or presentations.
- Work collaboratively in a team.
- Present research findings confidently.
- Demonstrate responsible AI use and academic honesty.
- Reflect on their learning and identify areas for improvement.

Practical Evaluation Rubric

Assessment Area	Marks
AI Research & Information Collection	10
Prompt Writing	10
Note-making & Summarization	10
Project Planning & Organization	10
Fact Checking & Verification	10
Responsible AI Use & Academic Integrity	10
Presentation & Communication	10
Team Collaboration	10
Critical Thinking & Problem Solving	10
Overall Practical Performance	10
Total	100 Marks

Teacher Observation Checklist

- ✓ Demonstrates effective use of AI productivity tools for research and learning.
 - ✓ Writes clear prompts and verifies AI-generated information using reliable sources.
 - ✓ Organizes research into structured notes, summaries, and project plans.
 - ✓ Demonstrates responsible AI use, academic honesty, and ethical digital practices.
 - ✓ Collaborates effectively with team members and presents research findings confidently.
-

Chapter Learning Outcomes

After completing the **Chapter-End Activities** for **Chapter 1: AI Productivity & Research**, students will be able to:

- Use AI tools effectively for **research, note-making, summarization, project planning, and information organization**.
- Write effective AI prompts to obtain accurate and relevant information.
- Verify AI-generated content using reliable sources and apply **fact-checking** techniques.
- Demonstrate **responsible AI use**, academic integrity, and ethical digital citizenship.
- Collaborate with peers to complete AI-assisted research projects and present findings confidently.
- Apply AI productivity skills in **assignments, projects, presentations, examinations, and real-world problem-solving** while using AI safely, responsibly, and effectively.
