

Chapter 3: Digital Content Creation

Class 17 – Short Video Creation Basics

Learning Objectives

After completing this lesson, students will be able to:

- Understand the fundamentals of short video creation.
 - Explain the importance of video content in digital communication.
 - Plan and organize a short educational video.
 - Write a simple video script and storyboard.
 - Apply basic video recording and editing techniques.
 - Create short videos using Canva and other beginner-friendly video editing tools.
 - Demonstrate responsible and ethical digital media creation.
-

Introduction

Short videos have become one of the most popular ways to communicate ideas, educate people, promote products, and spread awareness. Today, educational institutions, businesses, and content creators use short videos on platforms like YouTube, Instagram, Facebook, and school websites to share information in an engaging way.

A good short video combines **planning, storytelling, visuals, audio, and editing** to communicate a clear message within a short duration. Learning basic video creation helps students improve creativity, communication, teamwork, and digital skills.

What is a Short Video?

A **Short Video** is a brief digital video, usually lasting **30 seconds to 3 minutes**, created to communicate information, educate, entertain, or promote an idea.

Short videos use:

- Images
- Video clips
- Text
- Music

- Voice-over
- Animations
- Transitions

to deliver a message effectively.

Importance of Short Video Content

Short videos help to:

- Explain ideas quickly.
 - Increase audience engagement.
 - Improve learning.
 - Promote awareness campaigns.
 - Present projects creatively.
 - Improve communication skills.
 - Enhance digital creativity.
-

Types of Short Videos

1. Educational Videos

Used to teach concepts or explain lessons.

Examples:

- Science Experiments
 - AI Productivity Tips
 - Mathematics Tricks
-

2. Awareness Videos

Created to educate people about social issues.

Examples:

- Save Water
- Plastic-Free Earth

- Road Safety
 - Cyber Safety
-

3. Promotional Videos

Used by businesses to advertise products or services.

Examples:

- School Admissions
 - Product Launches
 - Restaurant Promotions
-

4. Informational Videos

Provide useful information on a specific topic.

Examples:

- Healthy Lifestyle
 - Renewable Energy
 - Space Exploration
-

Planning a Short Video

Before recording, students should plan:

- Topic
- Purpose
- Target Audience
- Key Message
- Duration
- Scenes
- Background Music
- Ending

Planning ensures the video is clear and organized.

Storyboarding

A **Storyboard** is a visual plan that shows each scene of the video before recording.

Storyboard Example

Scene	Visual	Narration / Text
1	School Garden	"Welcome to our Save Trees campaign."
2	Students Planting Trees	"Trees provide oxygen and protect our environment."
3	Green Park	"Let's plant more trees for a better future."
4	Closing Screen	"Save Trees, Save Earth."

Storyboards help organize ideas before filming.

Script Writing Basics

A **Video Script** is the written plan for what will be spoken and shown in the video.

A simple script includes:

- Introduction
 - Main Message
 - Supporting Information
 - Conclusion
 - Call-to-Action
-

Example Script

Title: Save Water

Introduction:

"Water is one of our most valuable natural resources."

Main Message:

"Simple habits like turning off taps and fixing leaks help save water."

Conclusion:

"Every drop counts. Let's save water together."

Video Recording Techniques

Students should:

- Hold the camera steadily.
- Record in good lighting.
- Use a quiet location.
- Speak clearly.
- Keep the background clean.
- Record short clips.
- Use landscape or portrait mode as required.

Basic Video Editing

Editing improves the quality of a video.

Students can:

- Trim unwanted clips.
- Arrange scenes.
- Add text.
- Insert background music.
- Add transitions.
- Include subtitles.
- Adjust brightness.
- Improve audio.

Adding Text, Music & Transitions

Use:

Text

- Titles
- Headings
- Captions
- Closing Messages

Music

- Soft background music
- Royalty-free music
- Educational soundtracks

Transitions

- Fade
- Dissolve
- Slide
- Zoom

Use transitions carefully to keep the video professional.

Creating Videos Using Canva

Steps

1. Open Canva.
 2. Select **Video** or **Mobile Video** template.
 3. Add video clips or images.
 4. Insert titles and captions.
 5. Add transitions.
 6. Include background music.
 7. Record or upload a voice-over (optional).
 8. Preview the video.
 9. Export in MP4 format.
-

Video Design Best Practices

Students should:

- Keep videos short and focused.
- Use clear visuals.
- Speak clearly.
- Maintain consistent colors and fonts.
- Use readable text.
- Add meaningful background music.
- Review before exporting.

- Save the final version properly.
-

Responsible Digital Media Creation

Students should:

- Respect copyright laws.
 - Use royalty-free music and images.
 - Give credit when required.
 - Avoid offensive or misleading content.
 - Protect personal privacy.
 - Obtain permission before recording others.
 - Share truthful and educational information.
-

Common Video Creation Mistakes

Avoid:

- Shaky camera movements.
 - Poor lighting.
 - Background noise.
 - Long introductions.
 - Too much text on screen.
 - Unnecessary effects.
 - Low-quality audio.
 - Inappropriate music.
-

Real-Life Applications

Short video creation is used in:

- School Projects
- Educational Content
- Business Promotions
- Social Media Marketing
- Public Awareness Campaigns
- Product Demonstrations

- Online Learning
 - Event Highlights
 - Digital Advertising
 - News Reporting
-

Career Opportunities

Short video creation skills are valuable for careers such as:

- Video Editor
 - Content Creator
 - Digital Marketing Executive
 - Social Media Manager
 - Multimedia Designer
 - YouTuber
 - Animator
 - Advertising Designer
 - Media Producer
 - Creative Director
-

Revision

Students should revise:

- Short Video Creation
 - Storyboarding
 - Script Writing
 - Video Recording Techniques
 - Video Editing
 - Canva Video Design
 - Responsible Media Creation
 - Best Practices
-

Did You Know?

- Short educational videos often improve learning by combining visuals, audio, and text.
 - Storyboards help creators organize scenes before recording.
 - Many businesses use videos shorter than one minute to communicate key messages effectively.
 - Canva allows users to create professional videos using templates, animations, and built-in editing tools.
-

Points to Remember

- Plan your video before recording.
- Write a simple script and storyboard.
- Record with good lighting and clear audio.
- Keep videos short, engaging, and informative.
- Always create and share digital content responsibly.
